CERTIFICATIONS

- Html,Css,Javascript-coursera
- AI for everyone-coursera
- python basics-coursera
- Android app development -udemy

LANGUAGES

- : ENGLISH
- : TAMIL
- : MALAYALAM

WORKSHOPS ATTENDED

- **IISC BANGALORE**-ANDROID APP DEVELOPMENT
- **IIT MADRAS** -PCB DESIGNING

INTEREST,HOBBIES

- Updated about latest technologies
- Reading self-improvement books
- Riding motorbikes and exploring

EXPERIENCE

Student Intern / Researcher

DATA SCIENCE AND ANALYTICS CENTER[DSAC]-KCE

- *Learned about Big data handling tools*
- *Devoloping Dashboards and visualizing data using Tableau Desktop*
- *Studies also include Machine Learning with R*

EDUCATION

School | Sacred Heart matriculation school

🗓 2016   📍 nilgiris, Tamilnadu

- SSLC -95.6%
- HSC in computer Science-88.5%

University | Karpagam college of Engineering

🗓 2018-2022   📍 coimbatore, Tamilnadu

- GPA: 9.12 (*till 4th semester)

PROJECTS

Dashboard on online food delivery app

- Online food delivery is way popular now a days,analyzing data and visualizing them in a proper way is done in this project .
- Tableau Desktop is used for this project,This dashboard is much informative for future buisness purpose.

Timer — an Android app

- This project was developed for my own personal use,it helps me while I am doing a workout to set a particular time and an alarm beeps later.
- This was developed for my convenience and for my daily use,and can be expanded.

Line follower —line follower robot.

- This project is about following the dark surface(a black line) in the floor, with the help of two infrared sensors(they detect the surface).
- This project is mainly done without an arduino but only with an IC.
